Experiment-2.3

Student Name: Kamal Ale Magar   **UID:** 21BCS10155

Branch: B.E.-CSE   **Section/Group:** 616-B

Semester: 6th   **Date of Performance:** 29/02

**Subject Name:** Cloud Computing and Distributed Systems

Subject Code: 21CSH-378

Aim: To Find a procedure to transfer the files from one virtual machine to another virtual machine.

**Objective:** The objective is to Find a procedure to transfer the files from one virtual machine to another virtual machine.
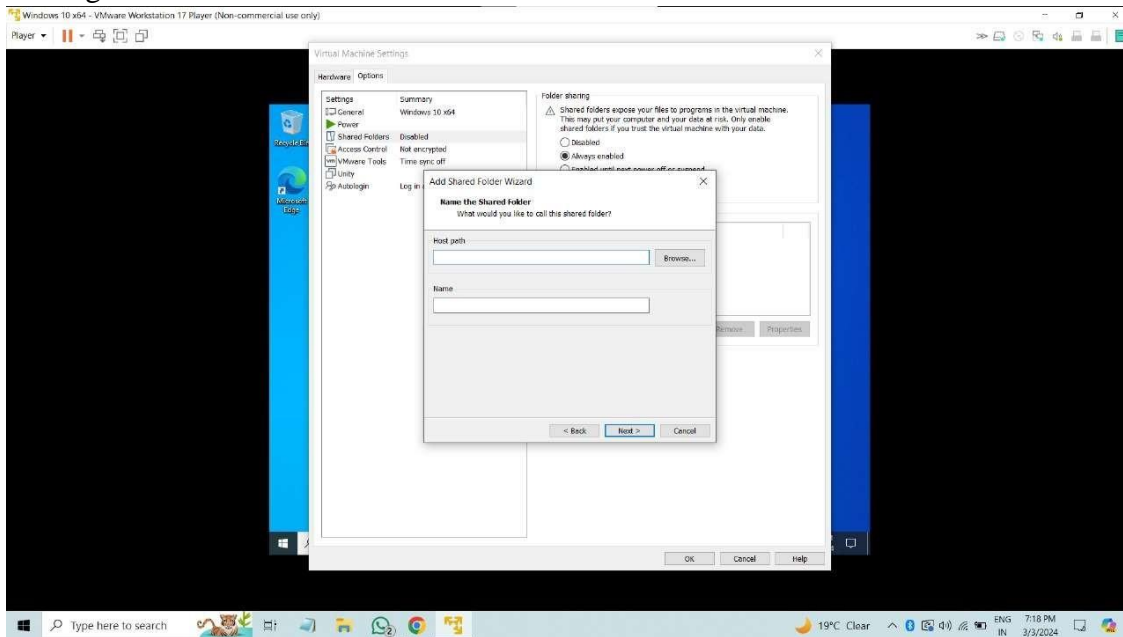

Script and Output:

**Step 1:** Create a folder named share on desktop on the machine
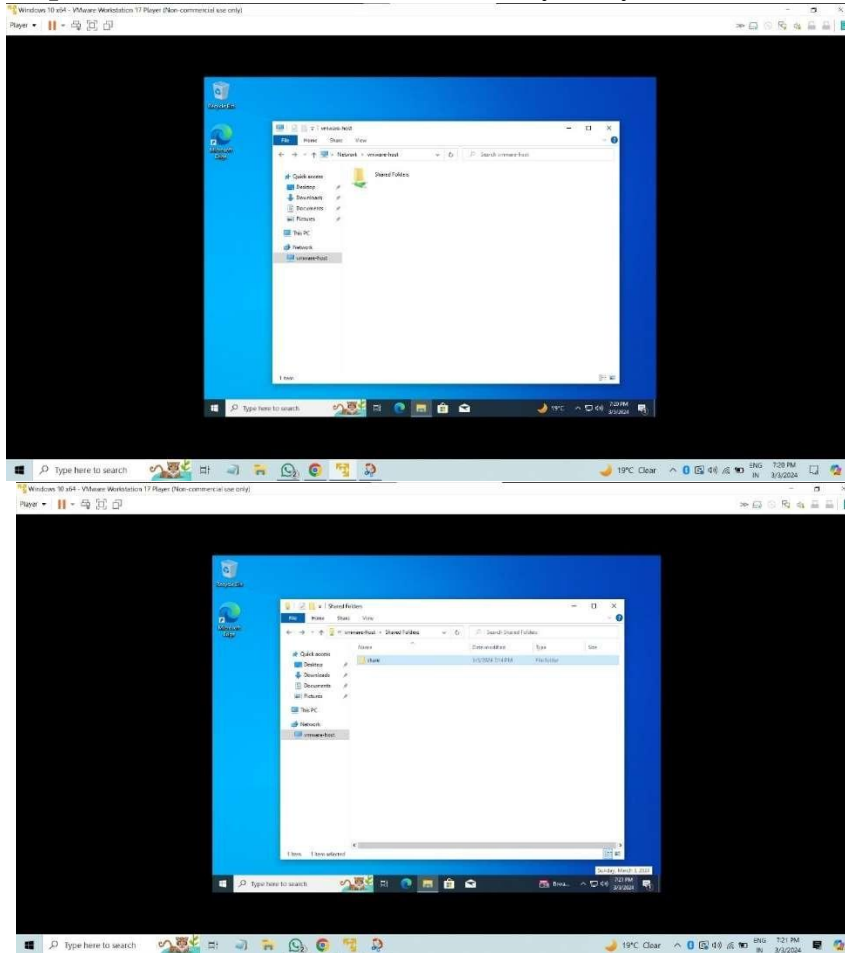

Step 2: Start the virtual machine.

Step 3: Once the virtual machine is running, go to VMWARE setting and in options turn on enable for file sharing.

Step 4: Look for the shared folder under Network Locations or Shared Folders. It might be named something like \\vmware-host\Shared Folders\<folder name>.

Step 5: Access the shared folder and verify that you can see the files from the Windows desktop machine.

Learning Outcomes:

- Understanding of Cloud Computing Concepts
- Critical Thinking and Problem-Solving
- Data Analysis and Visualization
- Decision-Making in Cloud Infrastructure Management
